

Cotopat

Real time communication. Inclusive by design.

Cotopat is a real-time communication solution designed to ensure every voice is heard. Built with inclusion at its core, it enables seamless, accessible engagement across any environment.

For address change.
You need ID, verification
and proof of new
address.

Key features

Real-time Captioning

Instantly converts speech to text with intelligent context correction for improved accuracy.

Visual Communication

Displays diagrams and videos alongside conversation, making complex information immediately accessible.

Multilingual Support

Translates conversations in real time with two-way display, allowing users to communicate in their preferred language.

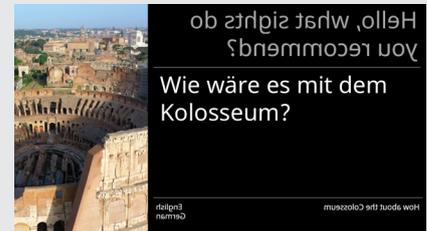

Useful features

Two-way Translation Display Support

Spoken words are translated into the other person's language and displayed in their orientation. Supports 73 languages for two-way translation display.

AI-Powered Conversation Summaries

When users agree and wish to have a summary, Cotoplat records conversation logs* to provide AI-generated conversation summaries for customers.

*Can be enabled/disabled via administrator settings. All conversation data is processed in compliance with European privacy regulations.

Simple Operation with Numeric Keypad

Cotoplat Screen offers seamless operation through a simple numeric keypad*, allowing users to easily control functions like turning the microphone on/off and selecting languages.

*Up to 7 languages of your choice can be assigned to the numeric keypad for quick access

Installs in minutes and works effortlessly within your current systems. User-friendly design ensures quick adoption with minimal staff training.

Meeting Evolving Communication Challenges

How Cotopat helps

Supports organisations in delivering inclusive, accessible communication for individuals with hearing impairments, limited English proficiency, and diverse accessibility needs. Designed for environments including healthcare, financial services, government, and public-facing settings.

How Cotopat differs

Enables secure recording and downloadable transcripts of every interaction, creating a reliable record for compliance, reference, and accountability. Combined with professional-grade, visible translation, it supports accurate communication without compromising human connection.

Example of where Cotopat is most useful:

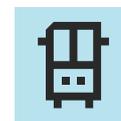

Local Government offices

Improves communication across council offices and customer service centres, supporting clear engagement with diverse communities and non-native speakers.

Healthcare Services

Enables accurate, real-time communication in hospitals, clinics, and pharmacies- ensuring critical medical information is clearly understood.

Transportation Centres

Enhances passenger experience across airports and transport hubs, supporting clear communication around ticketing, connections, and service updates.

Hotels and tourism info desks

Supports visitor engagement across tourism centres, museums, and heritage sites, enabling staff to communicate detailed information with confidence.

Banking and Financial Services

Facilitates clear communication of complex financial information, supporting clients with hearing impairments or limited local language proficiency in the local language.

Education and Training

Promotes inclusive learning environments by supporting real-time, accessible communication in classrooms, training sessions, and professional development programs.
