

Technology solutions for the digital classroom

Today's students are the most digitally advanced generation in history and schools need to keep up

Partner with a single technology partner to streamline school operations, reduce costs, and support more connected learning.

Kyocera delivers far more than print. Our integrated approach combines ICT, print, and document automation to give teachers, students, and administrators secure, reliable access to the information they need.

We help educational institutions modernise by connecting systems, digitising workflows, and simplifying how information is managed. From infrastructure and cloud through to intelligent document solutions, we support more efficient schools and better learning outcomes.

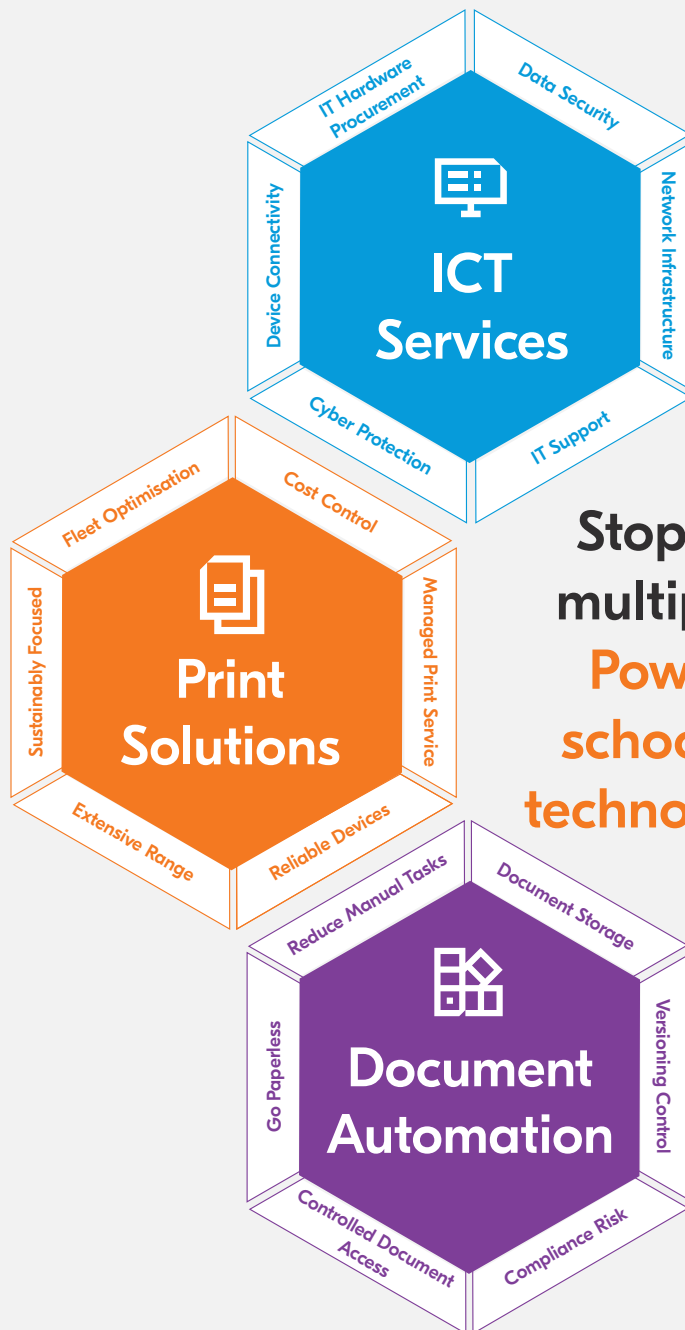

The first step is establishing the right foundation—

reducing print costs and digitising administrative processes. From there, staff can securely access and share information from anywhere, enabling more effective collaboration with students and peers. With these elements in place, institutions can optimise their environment and unlock greater value across their operations.

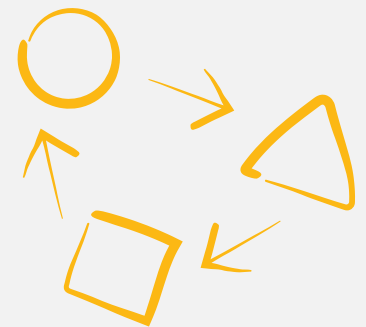

Kyocera brings the expertise to support this journey—now and into the future. Our ICT specialists help you continuously improve processes, strengthen security, and adopt new technologies that enhance how your institution operates.

Transform your institution with a partner that supports every stage of your evolution. Contact us today to arrange a free consultation.

Stop managing multiple vendors. Power smarter schools with one technology partner.

Reliable printing, responsibly designed

Engineered for consistent performance in demanding school environments, Kyocera devices deliver reliable, high-quality output you can depend on every day, supported by an efficient design that helps reduce environmental impact over time.

Reduce school costs with Kyocera

Kyocera helps schools reduce costs with devices designed around long-life components, minimising service requirements while delivering a lower total cost of ownership. Our Tiered Colour System ensures you only pay for colour used on each page, rather than a fixed rate, so you spend less on printing and more on educating.

Tailored solutions to optimise secure documents

Kyocera provides tailored solutions to help education providers optimise document workflows while keeping sensitive information secure. With built-in security controls and compliance support, alongside automation that reduces manual tasks, schools can improve efficiency, accuracy and overall document management.

End-to-end technology provider

Kyocera delivers ICT solutions for education, helping protect against cyber threats while enabling mobile ready environments suited to BYOD. From teacher laptops and classroom screens to on-site servers, all technology is supplied, installed and managed for a seamless experience.

Smarter printing for every school space

Private and single office printing

Best suited for: Principals, Deputy Principals & Heads of Department

Typical applications: Confidential documents, reports, sensitive correspondence.

Speed: 20 - 40 ppm

ECOSYS
20 - 60 ppm

Office & administration printing

Best suited for: Faculty offices, student services, administration teams.

Typical applications: Shared departmental printing and daily office workflows

Speed: 40 - 60 ppm

Teacher and BYOD printing

Best suited for: Teacher resource areas, libraries and shared printing areas

Typical applications: Lesson plans, handouts, assessments and classroom materials

Speed: 60 - 75 ppm

TASKalfa
60 to 105 ppm

High volume school printing

Best suited for: Large schools, TAFEs & Universities

Typical applications: Bulk classroom resources, examination packs and departmental printing

Speed: 70 - 105 ppm

High speed
150 ppm

Dedicated print rooms

Best suited for: High volume education facilities.

Typical applications: Course packs, student workbooks, prospectuses, school wide notifications and dedicated printing rooms.

Speed: 150 ppm

Service that counts

Kyocera's expert service and support keeps your devices performing at their best, minimising downtime and maximising reliability. With proactive maintenance and rapid response, you can rely on Kyocera.

Cloud connected. Future ready.

Kyocera cloud-connected devices act as a digitisation hub, capturing paper documents and converting them into secure, searchable digital files. With seamless integration into your cloud environment, information is protected, compliant and easy to access.

A strategic technology partner for education

Kyocera delivers end-to-end technology capabilities that support secure, scalable school environments. From cybersecurity and IT infrastructure to cloud, networks, and managed services, we provide a unified approach that reduces complexity and supports reliable, high-performing learning environments.

Cybersecurity & risk protection

With significant volumes of sensitive information to protect, Kyocera delivers proactive security frameworks, monitoring, and threat protection, supporting compliance and guiding schools on their journey towards Essential Eight maturity.

We modernise IT environments with cloud, hybrid, and on-premise solutions for greater performance, scalability, and efficiency, while sourcing and supplying the right laptops, displays, and devices, all professionally installed and configured to ensure seamless operation from day one.

IT infrastructure & cloud enablement

Connectivity optimisation

Experience seamless connectivity with secure, high-performance networks that support digital learning, cloud applications, and growing device demands while keeping students and staff connected without disruption.

Working alongside your IT team, our fully managed IT services handle monitoring, maintenance, upgrades, and help desk support, with a dedicated team ready to step in and resolve issues quickly when escalation is required.

Managed IT services & helpdesk support

Strategic consulting & roadmap planning

Take a more strategic approach to technology with expert consulting and clear roadmaps that help plan future requirements, control budgets in a rising cost environment and ensure every investment supports your school's goals.

When sustainability matters, choose the right business partner

Reduce your environmental impact with Kyocera

Kyocera focuses on ecological thinking in every step of the process, from material procurement to manufacturing through to end-of-life and recycling. The result is groundbreaking products that can reduce your e-waste and when combined with our certified recycling partner, can redirect over 90% of e-waste material away from landfills.

Environmentally focused technology

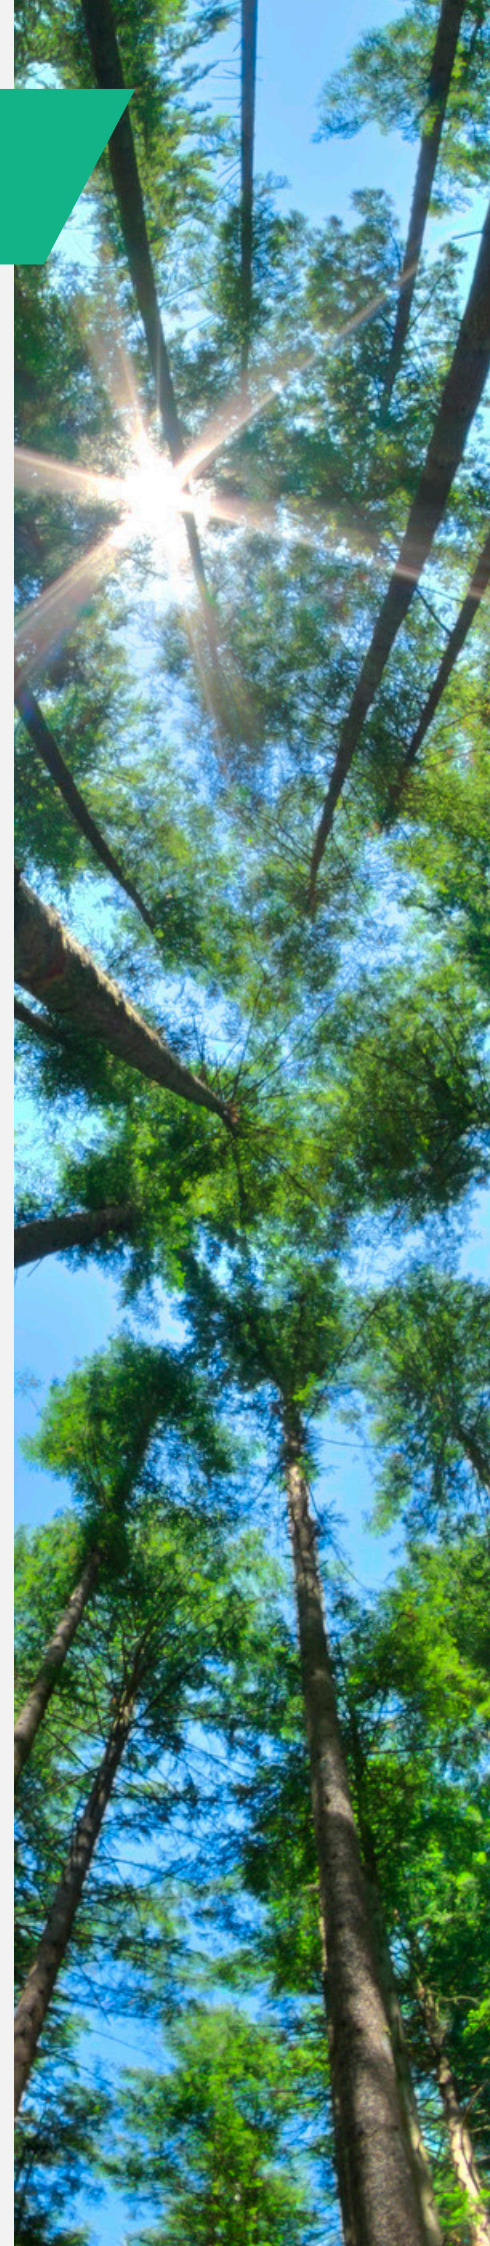

Kyocera has an extensive lineup of devices that are designed differently from the rest of the market and utilise cartridge-only technology. When it is time to replace the toner in a Kyocera printer, users only replace the toner cartridge, whilst on competitor's products, users need to replace the whole process unit - toner, drum, developer, charger and roller. Kyocera's TASKalfa range feature larger capacity toner cartridges and longer life drums which are made from amorphous silicon and can deliver a lifecycle of up to 600,000 pages.

The same technology that makes Kyocera ECOSYS printers cheaper to run also reduces their impact on the environment. Waste is drastically reduced by the cartridge free printing system. Instead of a cartridge comprising of over 100 different materials, the ECOSYS toner cassette is made of a single substance and ID coded for easy recycling.

Kyocera corporation named in 100 Most Sustainably Managed Companies in the World

Collated by the Wall Street Journal's environment, social and governance research division. More than 5,500 publicly traded businesses were analysed to produce its rankings of the most sustainable managed companies in the world. Kyocera Corporation was named number 46 and demonstrates our ongoing commitment to working towards a more sustainable world and positive impact of our actions.

Reduce your printing costs with our Tiered Colour System

Our unique **Tiered Colour System** automatically determines the amount of colour used on each page

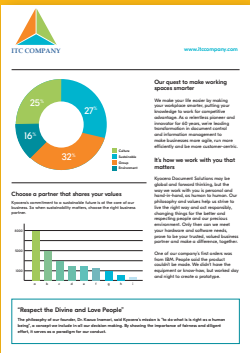

Besides the traditional colour and black and white counters, Kyocera's TASKalfa devices also have three additional counters which calculates the toner coverage of printed and copied pages. This then allows pages to be categorised in a tiered pricing structure instead of charged at one higher flat rate - this could save you thousands over the life of your printer.

Three tiers that put you in control of colour printing and reduce costs

SIMPLE COLOUR
(Low Coverage)

A colour company logo on black and white correspondence.

BUSINESS COLOUR
(Medium Coverage)

A report that contains colourful charts and graphs with text.

CREATIVE COLOUR
(High Coverage)

Colour rich collateral such as brochures and presentations.

Kyocera Document Solutions has championed innovative technology for more than 60 years. We enable our customers to turn information into knowledge, excel at learning and surpass others.

With professional expertise and a culture of empathetic partnership, we help organisations put knowledge to work to drive change.
