

TASKalfa MZ9500ci and MZ10500i Series

Streamline your workflows, bring professional clarity to your output, and optimise your operational costs.

TASKalfa MZ9500ci and MZ10500i Series

A3 Colour & B&W MFPs: Copy, Print, Scan, and Optional Fax

105 ppm B&W | 80 ppm Colour

Up to 300 ipm AI-enabled Straight Path Scanning

Dual Toner Container System for Uninterrupted Printing

2400 x 2400 DPI with Integrated ICC Profiles

Enduring Power. Clear Results.

This series delivers professional results for complex print and scan jobs. Featuring advanced workflow capabilities, dependable performance, and consistent colour output, these devices enhance operational efficiency and cost management.

Consistency that benefits the bottom line

Deliver stable output with built-in ICC colour profiles and automatic calibration technology, supporting long runs and minimising reprints.

Smarter workflow integration

Fiery® and the Kyocera Production Printing System (KPPS) make handling large print runs simple. They ensure precise colour accuracy, streamline job management, and help reduce production costs.

Strong protection for sensitive work

Advanced security keeps information safe throughout capture, routing, and output.

Efficiency that supports sustainability

Empower your sustainability journey with actionable insights and eco-friendly technology.

Sharper, clearer colour

Advanced toner formulation and ceramic-based image processing technology work together to deliver bright, vivid prints with exceptional clarity.

Reduce downtime with uninterrupted printing

Industry-first dual toner container system and high paper capacity keep your team moving, reducing downtime.

Powering High-Volume Print & Scan

- + **Handle large print jobs** with speed and reliability at reduced operational cost.
- + **Maintain a reliable workspace** with minimal interruptions and downtime, thanks to a compact design that saves space and simplifies tasks.
- + **Convert paper to digital** files quickly and securely.
- + **Support your sustainability journey** with actionable insights and eco-friendly technology.

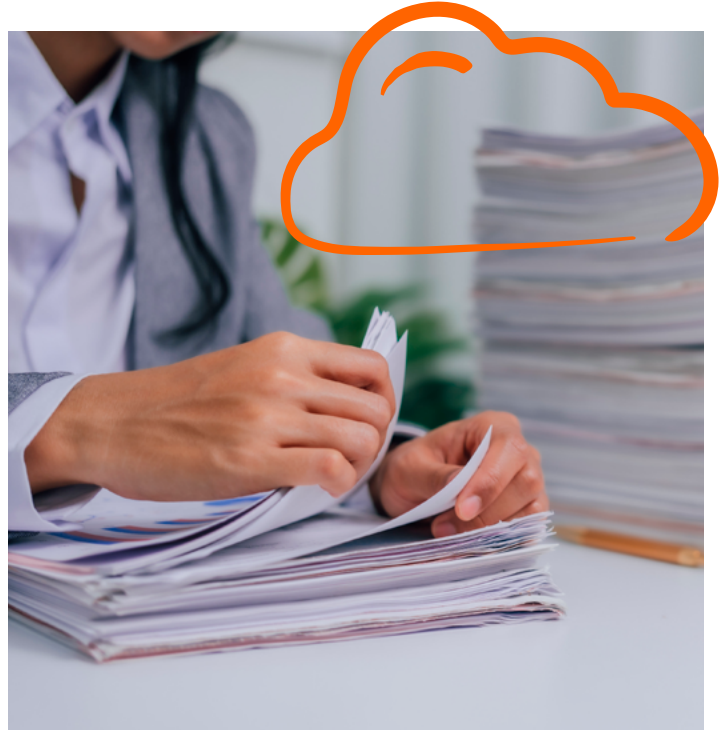

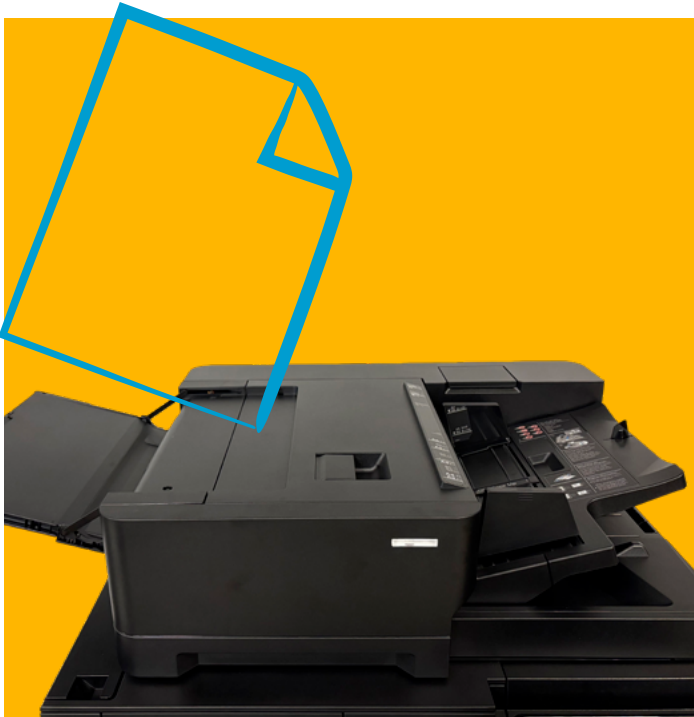

Delivering High-Quality Colour Output

- + **Translate ideas into colour-rich output** with clarity and consistency.
- + **Accelerate production from concept to final output** using advanced software options.
- + **Maximise budget efficiency** by reducing interruptions and reprints.
- + **Ensure polished results** with precise, reliable performance across long runs.

Ignite Your Workflows

Kyocera brings stability, speed, and simplicity for easy handling of high-volumes of information every day, working with greater control and less disruption.

Boost Efficiency While Slashing Costs

-  **Handle high-volume jobs**, whether print or scan, with speeds of up to 105 ppm and flawless performance which enables seamless, uninterrupted workflows.
-  **Keep downtime to a minimum** with our dual-container toner technology which means you can swap cartridges, even while the print job continues, and rapid maintenance can get you back up and running in just two minutes.
-  **Maximise space efficiency** with a compact device to resolve all your needs while taking up to 36% less floor space for the finisher compared to predecessor models.

Next-Level Digitisation Of Your Files

-  **Our AI-powered scan solution can handle up to 5,000 pages per file** at a speed of 300 images per minute, while automatically detecting errors in the process.
-  **Scan more types of documents in one step** from thick media to IDs, with our leading straight-path scanner and intelligent tilt correction.
-  **Digitise instantaneously with pre-installed cloud capture** and barcode scanning to make your documents searchable and editable with a single touch.

Security That Gives You Peace of Mind

-  **Focus on the task at hand knowing that your information is locked down** with global security stand certifications such as FIPS 140-3, ISO/IEC 15408 and more.
-  **Advanced encryption and best-in-class compliance frameworks** mean that you can stay ahead of regulation changes and prevent breaches.
-  **Make IT configuration and monitoring simple with CCRX**, centralised, browser-based management with three preset levels.
-  **Prevent unauthorised copying or scanning** with technology that proactively scans for sensitive watermarks, stamps or confidential text.

Sustainability That Pays For Itself

-  **Reduced waste** through condition-based calibration that prevents print defects before they occur.
-  **Monitor CO₂ emissions and energy use** in real time to reduce your environmental footprint.
-  **Lower environmental impact** with energy-efficient system design and long-life components.
-  **Technology designed to reduce consumables usage** and support more sustainable operations.

Brilliant Colour for Every Page

Optimise colour quality across your print job from start to finish, empowering you to reduce costs without compromise.

High-Volume Print That Makes an Impact

Reliable, repeatable colour across every job with high-quality colour supported with 2400x2400 DPI for strong clarity in your prints.

Precise colour, regardless of the size or complexity of your print job thanks to built-in ICC colour profiles and media catalog function.

Highly accurate front-to-back registration ensures designs come out clear, and aligned; they will be in the right spot on every print.

Flexible reproduction for diverse applications, from internal materials to polished external communications with paper sizes of up to 13"x19".

Steady Quality, Bigger Savings

Unlike competitor devices where colour needs frequent calibration, the TASKalfa MZ9500ci and MZ10500i Series boasts built-in, condition-based technology for faster, consistent, print quality.

Others devices

TASKalfa MZ9500ci and MZ10500i Series

Add a Professional Finish

Fast print software performance through Fiery and the Kyocera Production Print Suite and automated workflows speed up review cycles, cutting turnaround times and overall campaign costs for high-volume CRDs. Combine it with a finisher that provides flexibility and takes up 36% less floor space than previous models.

Mailbox

Sort print jobs into separate stacks for different users.

Booklet Maker

Print professional booklets that consistently offer a high-quality look and feel.

Inserter*

Add pre-printed covers, inserts, or specialty pages with ease.

Z-Fold*

Automatically fold invoices, brochures, and forms perfectly, for a flawless presentation.

*The inserter and z-fold finishers can be combined and included together on the devices.

Smarter workflows. Sharper results.

Boost efficiency to reduce costs with a device built for demanding workloads of print, scan and fax.

Advance digitisation with next-level straight-path scanning powered by AI handling up to 300 images per minute.

High-level security to give you peace of mind by matching global security standards.

Brilliant colour that is stable across content through automatic calibration and colour profiling.

Simple workflows to keep your device printing consistently with reduced downtime.

Optimise uptime for both print and scan to reduce manual intervention even for complex jobs.

Sustainable impact that pays for itself to reduce energy usage and your environmental footprint.
