

**Creating innovative solutions
for smarter healthcare**

Partner with a **total solutions provider** and access information like never before

Kyocera's cutting-edge technology and wealth of experience is here to drive your business forward.

Our holistic approach is dedicated to providing real solutions for real business challenges in the digital age. Our blend of expertise and innovative technology provides you with the tools to elevate your business to the next level. Watch your company transform quickly and efficiently with our hardware, software and multitude of services.

The first step towards becoming a digital business is to equip your team with the infrastructure they need to capture content quickly and accurately. The next step is to connect your people wherever they are, so they can share data in a controlled way. This enables information to always be where it's needed at the right time, in an organised and secure manner. Only then can its value be unlocked to drive increased collaboration and stimulate business growth.

Kyocera has the know-how to make this happen for you now, as well as in the future. Our ICT service providers will be by your side the whole way, helping you to continually optimise your processes and ensure you're always at the forefront of new technological developments that improve your operations.

Transform your workplace by partnering with a total solutions provider. Contact us today to arrange a free consultation.

We're with you **every step** of the way

Award winning devices

With an extensive range of devices that feature long-life components and fast, intelligent scanning capabilities, we will find a device to help you work smarter.

Extensive on-site warranty

For peace of mind, our warranties offer you our unique on-site protection* so you do not have to waste time sending a device back to base - our technicians will come to you!

Reliable support and management

Reliable support wherever you need it — delivered by our experienced support team and locally based service engineers.

Innovative business solutions for hybrid work environments

Most organisations are implementing remote and hybrid work policies. Ensure that staff are equipped with the right business solutions that keeps them connencted no matter where they are.

Innovative business solutions for the healthcare industry

As healthcare organisations invest in leading technology and process efficiencies, we're seeing front-line and administrative staff given the freedom to do what they do best - provide patients with the enhanced care they deserve.

At Kyocera, we empower healthcare providers to achieve this with our innovative business solutions that help reduce costs, secure data and increase efficiency. Our clients have the tools they need to quickly and securely access important information, no matter where they are.

With digital solutions at their fingertips, these healthcare providers are not only improving the care they provide to patients, but they're also gaining a competitive edge within their industry.

Knowledge at your fingertips

When it comes to the healthcare sector, everyone from the corporate administration and healthcare departments to the clinical workers and patients can benefit from digitisation.

Once information becomes digitised, it allows healthcare providers to automate and optimise workflows. Vital information then moves seamlessly which enables faster, more informed decision-making. And with tools like robotic process automation readily available, labor intensive tasks can be carried out almost instantaneously and with complete accuracy.

With knowledge at their fingertips, your team will have more time to focus on the things that can't be automated, such as caring for their patients.

Get started with your new Kyocera device immediately thanks to pre-loaded PCL, Postscript, Direct PDF and PRESCRIBE languages that guarantee compatibility with most healthcare systems. Selected Kyocera devices are also Cerner Certified and WebPAS approved.

With a range of over 50 printers and multifunction devices, we have a device to suit your specific needs, whether that's high-speed scanning or low-cost desktop printers.

Reduce your printing costs with our unique three-tier colour system that ensures you only pay for the colour that you use.

Never face extended device downtime again thanks to our unique warranty that offers on-site protection, where our technicians will come to you*.

Kyocera is helping
healthcare providers
digitise their workflows
to **access information**
like never before

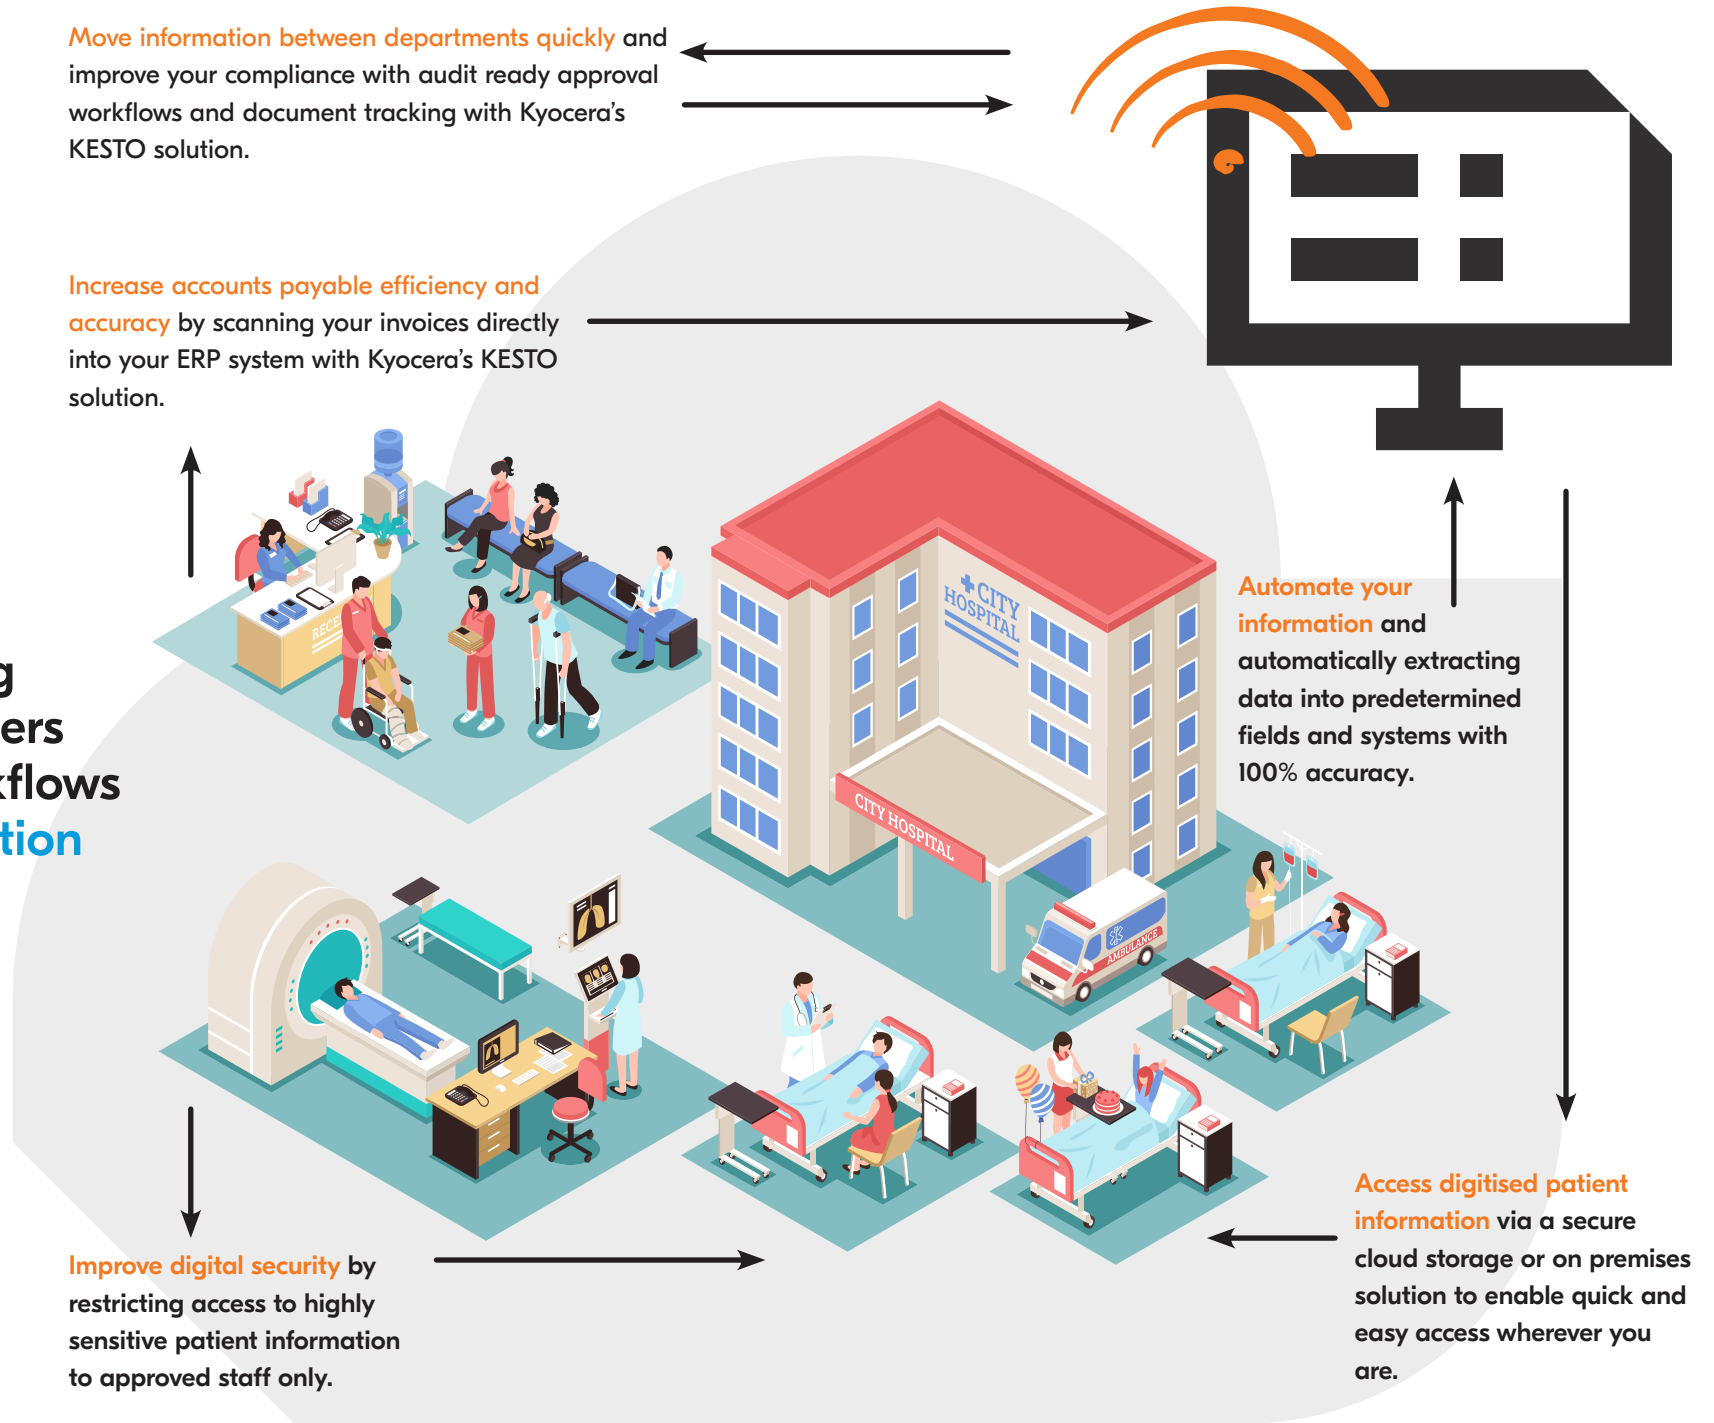

Move information between departments quickly and improve your compliance with audit ready approval workflows and document tracking with Kyocera's KESTO solution.

Increase accounts payable efficiency and accuracy by scanning your invoices directly into your ERP system with Kyocera's KESTO solution.

Automate your information and automatically extracting data into predetermined fields and systems with 100% accuracy.

Access digitised patient information via a secure cloud storage or on premises solution to enable quick and easy access wherever you are.

Improve digital security by restricting access to highly sensitive patient information to approved staff only.

TASKalfa multifunction devices are multi-talented

Our TASKalfa Multifunction Devices are specifically designed for longevity, minimum cost of ownership and maximum performance. Thanks to components unique to Kyocera, our devices require significantly less maintenance and far fewer components to maintain.

The TASKalfa difference

- Achieve outstanding print quality, colour consistency and contrast with our advanced toner technology
- Reduced printing costs and superior reliability thanks to Kyocera's unique long-life drum technology
- Embedded cloud connectivity and advanced security features
- An extensive variety of finishing, scanning and high volume document management options
- Superb environmental credentials due to ultra-low power consumption and lower your emissions

Use the QR code below to view our TASKalfa range.

ECOSYS means **less waste,** **long-life and low cost**

No matter where you are working, there is an ECOSYS device to help you work smarter. With our extensive range, you will find the perfect device for the busiest of offices or the most productive remote workspaces.

Our ECOSYS technology aligns with your sustainability goals.

Sustainability has been and always will be a staple in our ECOSYS devices. Our ECOSYS printers and multifunction devices were the first cartridge-free system for laser printing. This means that no drum replacement is necessary when the toner runs out of ink resulting in easier maintenance and less e-waste.

ECOSYS is for a productive remote workspace no matter where it is.

- Unbelievably low running costs
- Embedded security features
- Smaller compact devices & easy device set up
- Comprehensive warranty & support

Use the QR code below to view
our full range of ECOSYS printers
and multifunction devices.

When sustainability matters, choose the right business partner

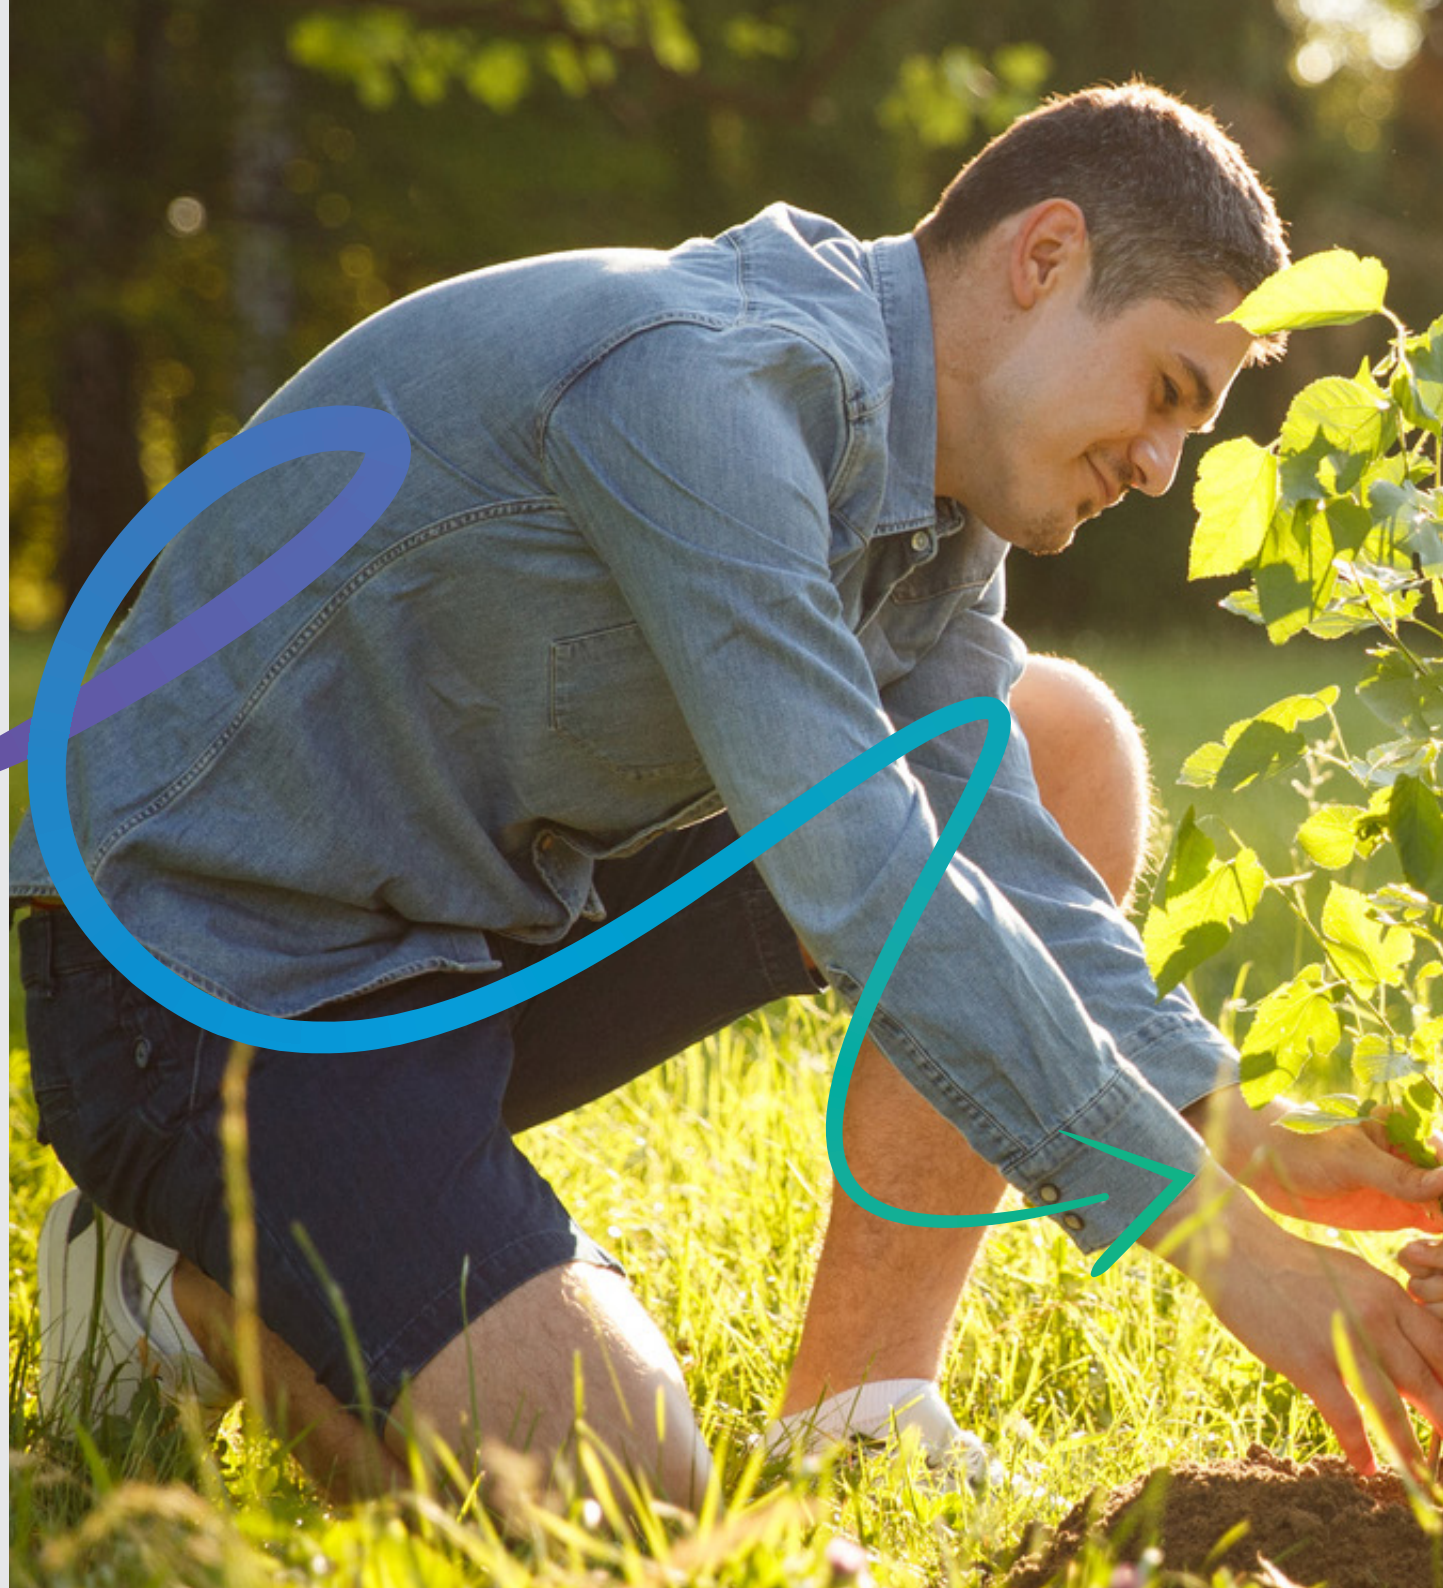

Reduce your environmental impact with Kyocera

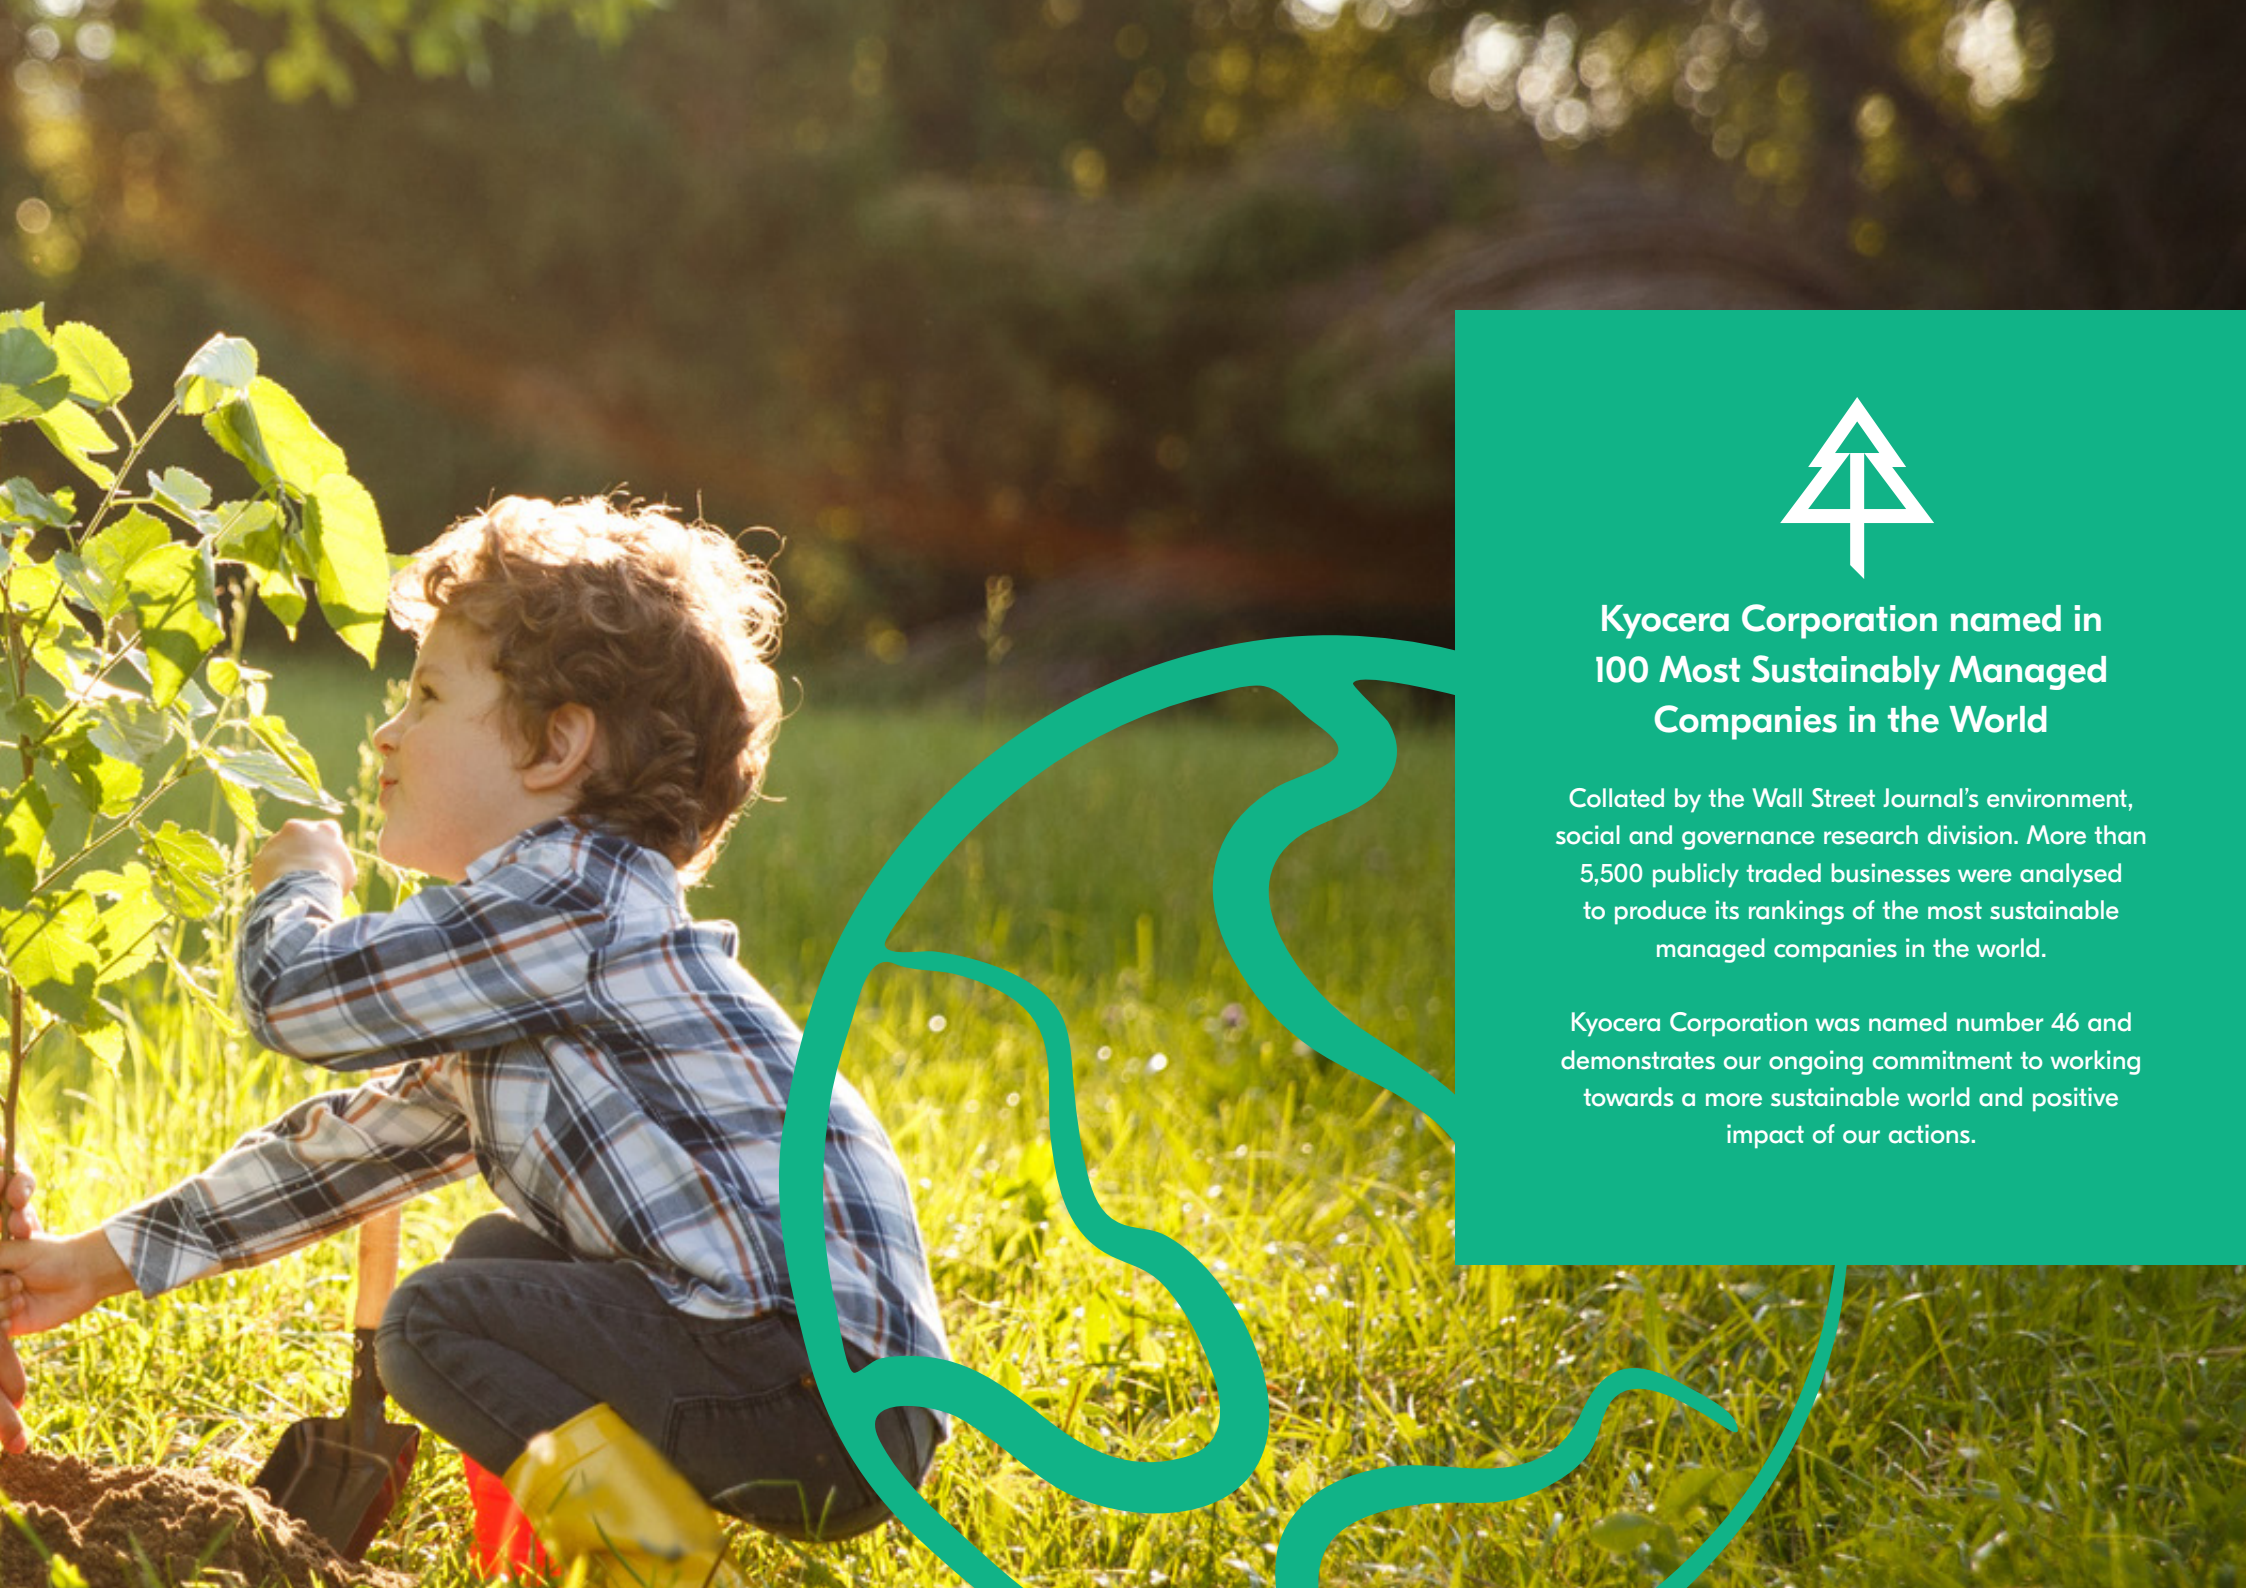

Kyocera focuses on ecological thinking in every step of the process, from material procurement to manufacturing through to end-of-life and recycling. The result is groundbreaking products that can reduce your e-waste and when combined with our certified recycling partner, can redirect over 90% of e-waste material away from landfills.

Environmentally focused Technology

Kyocera has an extensive lineup of devices that are designed differently from the rest of the market and utilise cartridge-only technology. When it is time to replace the Toner in a Kyocera Printer, users only replace the Toner cartridge, whilst on competitor's products, users need to replace the whole process unit - toner, drum, developer, charger and roller. Kyocera's TASKalfa range feature larger capacity toner cartridge and longer life drums which are made from amorphous silicon and can deliver a life-cycle of up to 600,000 pages.

The same technology that makes Kyocera ECOSYS printers cheaper to run also reduces their impact on the environment. Waste is drastically reduced by the cartridge-free printing system. Instead of a cartridge comprising of over 100 different materials, the ECOSYS toner cassette is made of a single substance and ID coded for easy recycling.

Kyocera Corporation named in 100 Most Sustainably Managed Companies in the World

Collated by the Wall Street Journal's environment, social and governance research division. More than 5,500 publicly traded businesses were analysed to produce its rankings of the most sustainable managed companies in the world.

Kyocera Corporation was named number 46 and demonstrates our ongoing commitment to working towards a more sustainable world and positive impact of our actions.

Reduce your printing costs with our Tiered Colour System

Reduce your printing costs with our
Tiered Colour System

Kyocera's unique Tiered Colour System is the
solution you've been looking for! Only pay for the
colour you use.

Works seamlessly with
Kyocera's TASKalfa colour A3
devices so you can start saving
straight away.

Print impactful documents with
a splash of colour or vibrant
full coverage pages to get your
message across at a lower
cost per page, based on tiered
billing.

Reduce the cost of your colour
printing by evaluating whether
you are printing a simple text
document with a colour
company logo or a full-colour
document.

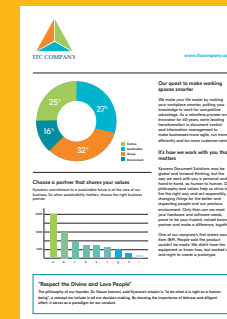

Our unique **Tiered Colour System** automatically determines the amount of colour used on each page

Besides the traditional colour and black and white counters, Kyocera's TASKalfa devices also have three additional counters which calculates the toner coverage of printed and copied pages. This then allows pages to be categorised in a tiered pricing structure instead of charged at one higher flat rate - this could save you thousands over the life of your printer.

SIMPLE COLOUR (Low Coverage)

A colour company logo on black and white correspondence.

BUSINESS COLOUR (Medium Coverage)

A report that contains colourful charts and graphs with text.

CREATIVE COLOUR (High Coverage)

Colour rich collateral such as brochures and presentations.

Kyocera Document Solutions has championed innovative technology for more than 60 years. We enable our customers to turn information into knowledge, excel at learning and surpass others.

With professional expertise and a culture of empathetic partnership, we help organisations put knowledge to work to drive change.
